EDUCATION

B.S.Abdur rahman crescent institute of science and technology , Chennai — BCA(Cloud tech & info security)

2024 - 2027

Currently pursuing a BCA with a specialization in Cloud Technology and Information Security. Developing practical skills in cloud computing, cybersecurity, Python, Linux, networking, and web development through projects and continuous learning.

PROJECTS

Face Recognition Authentication System

Developed an AI-powered Face Recognition Authentication System using Python, OpenCV, and the `face_recognition` library. The application captures and verifies users' faces in real time through a webcam to provide secure access. Implemented facial feature encoding, face matching, and automated authentication with high accuracy. Designed a simple, user-friendly interface and integrated image processing techniques to improve recognition performance.

PAASEA Sustainable Solutions – Company Website

Developed a responsive company website for PAASEA Sustainable Solutions to showcase its mission, sustainable products, services, and environmental initiatives. Designed an intuitive user interface with modern layouts, optimized performance across devices, and created engaging pages to effectively communicate the organization's commitment to sustainability and innovation.

SKILLS

Python Programing
SQL Programing
Web Development
Linux
Frontend Design

ADDITIONAL

Participated in Smart India
hackathon -2026

Attended One Day National
Level Workshop About
Cybersecurity Awareness to
Action

I regularly engage in coding
on platforms such as VSCode ,
Anaconda navigator and
Pycharm

LANGUAGES

English , Tamil

CERTIFICATION

Python – CodeChef
SQL – CodeChef
Project Management –
Coursera
AI Full Stack Workshop –
GUVI × HCL
ML Project Bootcamp –
SkillEcted
